

HAVE A GROW! TRIO TYFU!

Have a Grow

Are you ready to dig into a day of fun, connection, and growth? We're thrilled to launch this year's **Have a Grow** festivities, where we will help you to celebrate the beauty of community and growing through intergenerational activities that inspire inclusivity and resilience in your growing spaces.

On **Saturday 7th June**, we want you to open your growing spaces to show off your vibrant spaces and fill them with laughter, learning, and plenty of green! Whether you're a seasoned Have a Grow-er or just curious about getting your group involved, there's something for everyone.

Whether you're a community garden, city farm, school, care farm, or anything in between, HAG is a great way to engage your community and shout about what you do. You know your site and community best, so the type of HAG event you run is up to you!

Intergenerational Activities:

Organise hands-on workshops where grandparents can share their wisdom with children, and children can teach their elders about the latest gardening hacks! There could be: planting sessions, nature crafts, and storytelling circles that highlight the beauty of shared experiences.

Green Agenda:

Together, you could explore sustainable practices that help your community thrive. Learn about composting, native plants, or how to create a butterfly garden!

Building Community Resilience:

In these times, it's more important than ever to strengthen your bonds. Connect with your neighbours, share your stories, and discover how you can support each other in creating a more resilient community. You could have group discussions and brainstorming sessions to gather ideas on how to keep your community growing stronger together.

Join In!

Together, you can cultivate not just plants, but also a spirit of collaboration and respect for our environment. Join together and plant the seeds for a greener future—one that thrives on inclusivity and community strength.
